

NEWS FROM ALDERSHOT BRANCH 105

A warm welcome to you all in our local area. When you read this, summer will be coming to an end and hopefully the hose-pipe restrictions will be nearing an end also. At present, I am back and forward with watering cans on alternative days to keep my summer planting in reasonable condition. With Global warming an ever threat and the likelihood of ongoing watering bans, I will seriously have to think about reducing the amount I am planting each year.

It was good news that the Winter Fuel payments have been reinstated by the Government to the large majority of pensioners, I would presume this is applicable to most of our members. It must have been a real struggle last winter to those just above threshold to balance whether to heat or eat. Hopefully this year they won't be faced with this dilemma.

A few issues ago, I asked if anybody had an anecdote either about life or work experience they would like to share with us. Your name or any other names will be kept anonymous. Please respond to me at my Email address daveangie18@hotmail.co.uk
